ProSonix unveils a new corporate logo
New Direction for Fluid Heating Solutions

MILWAUKEE, WI, (July 2021): ProSonix, LLC is excited to announce the launch of a new ProSonix logo. The bold logo signifies a new direction of growth and opportunity for ProSonix.

“ProSonix is growing, and the new branding helps convey the energy that our team has for new opportunities in new markets,” explains Lori Phillips, Director of Marketing. “Our team is expanding as well as our equipment options and we are excited for the future of ProSonix.”

The new logo highlights the “X” in the ProSonix name. The “X” is a symbol of a converging and diverging nozzle which creates high velocity steam that allows for rapid, smooth condensation of the steam and fluid.

“Reliable and precise fluid heating is what our customers expect and will continue to be our commitment to deliver solutions that meet our customer’s needs. The new tag line, *Fluid Heating Solutions*, highlights the broad range of capabilities that ProSonix offers”, explains Tom Podwell, Co-owner.

ProSonix engineers and manufactures direct steam injection heaters for industrial applications. We serve markets that require everything from simple water heating to starch jet cooker and slurry heating. More news coming soon from ProSonix as we continue to grow in 2021. For more information, visit pro-sonix.com.

About ProSonix: ProSonix engineers and manufactures direct steam injection heaters for industrial applications. For over 15 years, ProSonix has worked with customers in the ethanol, pulp and paper, food processing and chemical processing markets. We are a trusted provider for the most difficult fluid processing applications around the globe. Visit pro-sonix.com to learn more.
